

## PERFORMANCE FEATURES

|                       |   |
|-----------------------|---|
| Panel Sizes           | 12 x 12 in. to 30.5 x 28 in.                            |
| Material Placement    | 0.3 in. accuracy in material and transverse direction   |
| Feed Rate             | Adjustable 1–6 in./sec                                  |
| Cycle Time            | <15 seconds including slip sheet handling               |
| Adjustable Tray       | To hold multiple size boards in place                   |
| Adjustable Head       | Suction cups can be easily placed in multiple locations |
| Multiple Vacuum Zones | Ensure proper grip even with through holes              |
| Tray Sensors          | To provide early warning of full or empty tray          |
| PLC Controlled        | Provides system and diagnostic feedback                 |
| Fully Integrated      | With process line controls and E-Stop circuit           |
| Slip Sheet Handling   | Automatic sensor detection and handling                 |
| Easy Access           | Multiple doors with CE rated safety switches            |
| Interleaf Tray        | Extends for easy access                                 |

## STANDARD FEATURES

|                       |  |
|-----------------------|--|
| Material Construction | Powder Coated or Stainless Steel and Anodized Aluminum |
| Material Drive        | Speed synchronized                                     |
| Controls              | PLC controlled   |
| Electrical Panel      | UL certified   |

## OPTIONS

|                                     |  |
|-------------------------------------|--|
| Reject Tray                         | To separate defective parts                  |
| Tacky Roll Cleaner                  | To clean and feed sheets prior to processing |
| Touch Screen User Interface         | For diagnostic messaging and control         |
| Process Data Collection             | Many SCADA packages available                |
| Marking Station for Defective Parts | Inkjet or laser marking available            |

## DIMENSIONS AND POWER

|  |   |
